inada chair W.1

*World's first
massage chair
that synchronises
music and sound
generated from a
home entertainment
system with massage*

Ivory

Black

Moveable Arm Rest

The INADA Chair W.1 features fully moveable arm rests on both sides. With the arm rest in the upright position, you can slide in or out of the chair from either side easily.

Flat Foot Rest

First massage chair with fully retractable foot rest. At its default position, the foot rest has a smooth flat silhouette. Once it is activated, side panels flip up to cradle legs and perform Multi-Point-Shiatsu-Massage.

Easy-to-use Remote Control

The INADA Chair W.1 is the world's first massage chair to synchronise music and sound generated from a home entertainment system (DVD, TV, VHS, CD, etc.) with massage. It will take your home entertainment experience to the next level by synchronising your audio-visual experience with a dynamic custom massage.

Healthcare Programs:

1. Fullbody Relief: Relaxes the muscles that affect your whole body and alleviates fatigue by stimulating shiatsu points.
2. Stiff Shoulders: Helps to relieve tension and stiffness around the neck and shoulders.
3. Neck Focus: Helps to relieve tension and stiffness on the neck area.
4. Lower Back Tension: Recommended for lower back muscle pain and fatigue.
5. Seat: Combination of vibration and air massage directly stimulates the muscles of the seat area.
6. Shiatsu: Slow motion shiatsu massage for entire body.
7. Morning: Uses a European massage technique moving from the extremities inward, toward the body's center. Recommended massage for first thing in the morning.
8. Night Time: Uses a Chinese massage technique moving outward, from the center of the body toward the extremities. Recommended for use before bed.

The INADA chair W.1 comes with a Synchroniser package, including an Amplifier Unit and a Speaker Head Rest, which connects the W.1 chair with your home entertainment system. Your massage will be keyed to the music and sounds in the bass range, tapping and back vibration for the treble range and leg vibration for the mid-range. You can adjust the bass and treble levels using "UP" and "DOWN" buttons on the synchroniser. The program can sense variations in rhythm and melody as well as volume, so you can enjoy as much variation in your massage as you do in your home entertainment collection. You can also adjust the sensitivity of the massage synchronisation to the audio. The program enhances the sensory experience of your massage for deeper mental relaxation.

Synchroniser

Name and Model	Synchroniser SYN-021A
Power Supply	AC240V
Power Consumption	15W
Auto Timer	Approx. 15 minutes (Synchronised Massage Program)
